# NFT MARKET PLACE

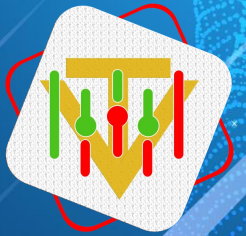

**NFT stands for Non-Fungible Token. Cryptocurrencies, which use a digital public record of transactions called a blockchain, are fungible. NFTs are digital items that can be bought and sold using this blockchain technology. But they are not fungible, making them a different type of asset.**

**Non-fungible tokens, commonly known as NFTs, are unique cryptographic tokens that exist on a blockchain and cannot be replicated—having a unique identification code and metadata.**
